

Insulated roller garage doors

Hurricane garage doors, manufactured from genuine Alutech components for peace of mind

Great features for a better garage door

1

Draft protection

Drafts are greatly reduced with our patented triple side guide sealing system. Aside from reducing drafts, it makes the door much quieter during operation.

2

Effective seal

Our deep rubber bottom seal provides an effective seal against water ingress at the bottom of the door – but only as good as the garage floor!

3

Superior automatic locking system for wider doors

Deprat™ locking assemblies with integrated steel reinforcing, offer the best protection against the door being forced open.

4

Anti-scuff locking system

Traditional locking system, but with an added anti friction coating that reduces friction marks on the inside of the door curtain.

5

Extra strong bottom lath

Deep extruded aluminium, enhances security of the door, stops it from being forced out of the side guides.

6

Optimum lath thickness

77mm x 19mm, offers one of the most rigid and insulated lath available today.

7

Abrasion resistance

PUR/PA* is a two layer lacquer coating applied to profiles at a thickness of 25-30 microns which provides an effective resistance to scratches and marks on the curtain.

High Quality Remote Control System as standard

All doors are supplied with a remote control system, which includes two transmitters, internal push buttons and courtesy light.

Wireless Safety Edge as standard

Built into rubber seal on bottom of door curtain. Stops and returns the door should it meet an obstruction.

Low level external override kit

All Hurricane doors are provided with a manual hand winding mechanism for use in the event of a power failure. However if the garage door is the only means of access, then an external low level override should be used.

Important notes

By the nature of a roller doors operation, it is inevitable that the laths will roll against each other. Hurricane safe guard against this eventuality by,

1. Lath being coated in PUR/PA* coating to reduce scuffs.
2. Offer Deprat™ or anti scuff locking device.
3. Triple brush inserts in side guides to reduce rubbing on operation.

Whilst we don't claim to eliminate all marks during operation we are confident that the steps taken will reduce them to less than our competitors.

Fully CE marked

Hurricane roller garage doors conform to the European Standards of safety and wind load resistance EN 13241-1, EN 12424. This is demonstrated by tests carried out by TUV independent test authorities. InsuRoll doors have been tested with a wind load of 59mph.

Virtually maintenance free

Looking after your door couldn't be easier, and with a little care and attention it will be virtually maintenance free.

Keeping the door clean by wiping the curtain with a damp cloth and mild detergent every so often will keep it looking great - and also help prevent damage to the surface. In a salt air environment this should be done monthly - but otherwise just if the door looks dirty.

Scratches can be touched up like a car to avoid rust, and touch-up paint is available from your distributor, but the motor and curtain are designed to be maintenance free and require no additional lubrication in normal use.

Hurricane garage doors, an investment in your home

By bringing together the highest manufacturing quality and leading design here in the UK, Hurricane provides the ideal roller garage door, providing superior protection in an attractive design.

Buying a new garage door is not an everyday purchase. The Hurricane range of garage doors is designed with that fact in mind to provide a long lasting product, that enhances the look of your home.

The Hurricane range is designed to help you make the most of that investment by delivering a garage door that meets all your requirements.

CE marked

The CE mark means your new door is fully compliant with all European directives.

Peace of mind warranties

Because we use only the finest materials in our doors, they come with a full warranty - so you can rest easy.

Hurricane - the right garage door for you and your home

Our doors come in a wide range of low maintenance colours, including textured woodgrain finishes that match the latest generation of UPVC windows and doors.

- Insulated laths form a curtain designed to a higher specification, which means our doors help to increase energy efficiency and reduce heating costs.
- Our space saving design eliminates intrusion into overhead storage space in your garage - and allows you to park right up to the door - unlike conventional up and over doors.
- Doors are fully CE approved.
- Using genuine Alutech components, our doors are all manufactured here in the UK and are installed by a network of local approved distributors.

Finishing Touches

Hurricane lath is manufactured from high grade aluminium and finished in a PUR/PA* coating which reduces abrasion, colour fading and surface cracking.

roller garage doors

Safety

A safety edge system is fitted to stop and reverse the door should it meet an obstruction when closing.

Conformity to standards

ALUTECH roller garage doors conform to the European standards of safety and wind load resistance EN 13241-1, EN 12424. This is confirmed by the TÜV-certificate of CE marking and by test reports.

Wind resistance

Classic roller garage doors withstand a wind load up to 450 Pa, corresponding to class 2 according to EN 12424.

Maximum space saving

Roller garage doors save space outside as well as inside the premises. They are the ideal solution for a garage with a short driveway. You can also efficiently utilise all available roof space, inside the garage.

Lightweight and durable

Aluminium roller garage doors are resistant to rain, to fluctuations in temperature and to corrosion. They are solid and secure, environmentally friendly and light.

Variety of mounting types

Roller garage doors can be mounted outside or inside the premises, with a visible or concealed shutter box. Available in 77mm or 55mm lath to suit the amount of headroom available.

Manufactured in the UK using genuine Alutech components by Hurricane Shutters and Doors.
